

A photograph of a lunar surface, likely the Moon, with various objects placed on it. In the foreground, there is a small, dark, rectangular object. To the left, a model of the Apollo 11 lunar module is visible. In the center, a small satellite or probe is standing. To the right, a Defender arcade machine is standing. The background shows the lunar surface with craters and rocks.

entertainment!**

**Record-breaking  
earnings!**

The most technically advanced  
video game ever created.  
And the most sensational!

# DEFENDER

Your mission, as Captain of the Defender, is to protect the humanoids stranded on the planet from their alien abductors. The scanner will help you determine strategy to shoot down the alien ships before they reach the humanoids. If you destroy the aliens only after they've captured their prey, you must return the humanoids to the safety of the planet or they will fall to their death. If an alien comes its victim out of your range, the humanoid will mutate, joining the alien force, and take to the assault with deadly vengeance!

The challenge becomes ever more intense as action progresses. Fighter ships and mines will test your skill. A direct hit will destroy a mother ship but smash it into a swarming mass of mini-ships which then must be wiped out! And if you don't act quickly, the cosmic baster will attack!

Use your 2 escape options only if all else fails! Your "smart bomb" power is limited and "hyper-space" puts you into an unknown time warp. But

beware! If all the humanoids are abducted, the entire planet will explode in a blinding flash!

#### Dimensions:

##### 1 or 2 player upright:

Height: 70" (177.8cm) Width: 28" (68.1cm)  
Depth: 30" (76.2cm) Weight: 255 lbs (562.1kg)  
110/220 volt

##### 1 or 2 player cocktail table:

Height: 27 1/4" (70.3cm) Width: 30" (76.2cm)  
Depth: 27" (68.9cm) Weight: 144 lbs (316.8kg)  
110/220 volt
